

Navier-Stokes 3D, $96^3$
test case 12 of 32 (largest error for both settings), final saved time, mid-plane (z index 48)

top: speed |u|, shared scale
bottom: $|u_{ROM} - u_{ref}|$, shared scale

relative L2 error, whole field, at this time:
recorded (initial-field norm):
accurate 0.207 %, fast 3.24 %
current-field norm (recomputed):
accurate 0.265 %, fast 4.15 %

max in plane 0.000369

max in plane 0.00289
