
Energy-weighted refinement: recorded training diagnostics
Energy objective and legacy monitor
Weighted squared errors
Additional accepted L-BFGS steps
Combined
Energy base
Added trace error
Legacy base (different weights)
Velocity-mode error
Relative mode error [%]
Additional accepted L-BFGS steps
Gradient-mode error
Relative mode error [%]
Additional accepted L-BFGS steps
Trace-gradient error
Error / teacher gradient norm [%]
Additional accepted L-BFGS steps
Mode 1
Mode 2
Mode 3
Mode 4
Termination: job_deadline. Trace error is relative to the FE teacher, not zero.
Legacy base uses different weights and is not optimized. Training-mode errors are not actual ROM flow errors.
